Industry Update: Launch of Indoor Air Quality Guidelines in Singapore in January 2023

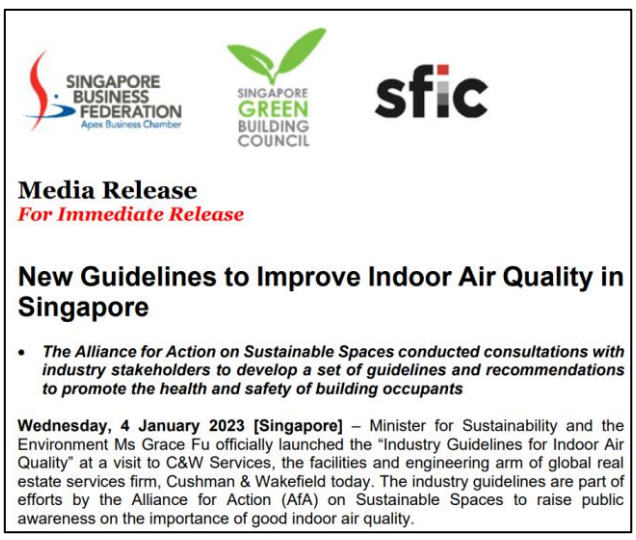

The **Singapore Paints and Coatings Association (SPACA)** is pleased to share the launch of the *Industry Guidelines for Indoor Air Quality*, introduced by the Alliance for Action on Sustainable Spaces and supported by the Ministry of Sustainability and the Environment.

These guidelines aim to promote healthier indoor environments by encouraging the use of low-emission materials, adopting best practices in ventilation, and aligning with established Singapore Standards.

Notably, **SPACA had the privilege of co-hosting an industry dialogue with NEA and SBF in June 2022**, prior to the launch of these guidelines. This early engagement provided a valuable platform for industry voices to contribute insights and feedback, reinforcing the importance of collaborative efforts in shaping sustainable indoor spaces.

As a key industry voice, SPACA remains committed to keeping our members and the public informed of developments that impact the built environment. We encourage all stakeholders to explore the guidelines and consider how they can contribute to safer, more sustainable indoor spaces.
