SPACA President Featured in Launch of New Technical Reference for Indoor Paints and Coatings TR 121

October 2024

We are pleased to share that **Ms Pamela Phua**, President of the Singapore Paint Industry Association (SPIA), was featured in the recent joint media release announcing the launch of **TR 121:2024**—a new Technical Reference aimed at minimising emissions from indoor paints and coatings to enhance indoor air quality.

In her remarks, Pamela highlighted the importance of transitioning to low-VOC and low-emission coatings, underscoring the industry's responsibility in promoting safer, more sustainable products. Her involvement reflects SPACA's active leadership in shaping national standards that support public health, environmental stewardship, and innovation in the coatings sector.

This recognition affirms SPACA's continued commitment to advancing quality and sustainability in Singapore's built environment.

JOINT MEDIA RELEASE

New Technical Reference to Minimise Emissions from Indoor Paints and Coatings, Ensure Indoor Air Quality

TR 121 sets limits on emissions from indoor air pollutants like formaldehyde, restricts heavy metal content

MR No.: 035/24

Singapore, Thursday, 3 October 2024

"Good indoor air quality is a cornerstone of green buildings. TR 121 will play a vital role in raising the bar for indoor air quality and will set clear standards for VOC and formaldehyde emission limits in floor coating products."

MR LEM YANG LIM
Senior Director, Singapore Green Building Council

"By setting clear guidelines for safer, more sustainable materials, it encourages the paint industry to transit towards eco-friendly formulations that minimise harmful chemicals. This shift not only aligns with increasing consumer and regulatory demands for greener products but also promotes long-term environmental stewardship."

MS PAMELA PHUA
President, Singapore Paint Industry Association
